COMPANY OVERVIEW

HUMAN ENGINEERING - PUTTING PEOPLE FIRST

Deeper than design or the depths of the foundations we dig, we value the depth of our empathy with the people whose communities we are working to transform.

At the heart of our company is a clear vision and unwavering commitment to remain true to why we got into the business of civil engineering in the first place: to improve and uplift the lives of people in a sustainable manner, without damaging the environment.

Whether it's housing developments where we literally turn farms into towns, implementing water and pipeline projects, sewer systems or the construction of road networks, in our quest to uplift communities, we commit ourselves to put one thing above all else - human beings.

Background

SCIP was founded in 1997 by Mr E P Mogale and Mr J D Booyens (snr.). Since then the company has become one of only a few fully black empowered companies that is also a specialist in the upgrading of national roads.

The success of SCIP over the last 20 years was mainly due to the combination of civil engineering experience with a liberated socio-economic view. SCIP has been nominated as both South Africa's Top Emerging Empowerment Company as well as Top Women Empowerment Company in the Consulting Engineering sector.

Service

Everything we do is guided by our belief that the goal of civil engineering is to serve the community and act as a catalyst for social development.

We derive great satisfaction from the fact that we are actively working to help make the world a better place. This is how we see our role in society:

01

To provide engineering infrastructure that successfully transforms the built environment into one that supports human development;

02

To play an effective role in stimulating the economy and increasing the country's GDP;

03

To initiate empowerment opportunities that change the face of the built environment;

04

To practice integrity, fair dealing, tolerance and respect and to uphold devotion to the standards and the dignity of our profession.

South Africa's future as a nation is closely tied to the environment and how we interact with it, using of space and consuming its resources.

As civil engineers, we are called upon to play an increasingly vital role in the sustainable management of these key economic drivers as we strive to ensure the country's future global competitiveness.

We commit to delivering effective engineering infrastructure that will play a major role in realising a better life for all South Africans.

COMPANY STRUCTURE

2.1 Directors

Director

Director Position

Mr Cobus Booyens	Managing Director
Ms Nomvula Mjodi	Financial Director
Mr Ndumiso Ndaba	Director of Strategic Planning and Business Development
Mr Philip Booyens	Director Private Clients
Mr Michael Barbosa	Director Abattoirs, Food Processing and Private Clients
Mr Tshweu Mokoena	Director Municipal Services
Mr Francois Deyssel	Director Structures and Buildings
Mr Abram Khithika	Director Public Clients

2.2 Personnel

Directors	8	<div>Total</div> <div>47</div>
Senior Civil Engineers	3	
Civil Engineers	12	
Civil Engineers Technicians	5	
Other Technical staff	5	
Admin staff	14	
Engineering Students	0	

2.2 Current Employment Distribution Figures

'Historically Disadvantaged Individual (HDI)' means a South African citizen: who had no franchise in national elections prior to the introduction of the Constitution of the Republic of South Africa, 1983 (Act no. 110 of 1983) or the Constitution of the Republic of South Africa, 1993 (Act no. 200 of 1993) ('The Interim Constitution'); and/or who is a woman; and/or who has a disability.

COMPANY REGISTRATIONS

SCIP complies with all the statutory regulations and is registered as follows:

Receiver of Revenue:	9080035844
VAT Registration Number:	4010168278
Registrar of Companies:	96/15526/07
ISO Registration Number	9877
BBBEE:	Level 1

Either the company or individual directors are registered with the following bodies:

CESA:	Consulting Engineers South Africa
ECSA:	Engineering Council of South Africa
SAWiC:	South African Women in Construction
NHBRC:	National Home Builders Registration Council
RMAA:	Red Meat Abattoir Association

COMPANY POLICIES

We provide equal employment opportunities regardless of race or gender, giving preference to historically disadvantaged individuals (HDI)

We also recognize our responsibility to protect the safety and health of all our customers and employees, and our commitment to protect the environment from any potential impact our operations may present through enforcing our Health & Safety, Environmental and Quality (SHEQ) Policies.

CONSULTING SERVICES

SCIP provides the full services normally expected from consulting engineers and depending on the type of project, we would provide some or all of the services listed below:

-
- Identify projects in co-operation with relevant stakeholders; provide full project description and list main actions to be taken.
 - Prepare and finalise pre-feasibility
 - Studies for the identification and implementation of EPWP Labour-Intensive Projects.
 - Prepare costing and where needed, assist to submit funding applications, for example MIG funding.
 - Conceptualise the project on approval of funding application.
 - Evaluate and assess the various options.
 - Prepare detailed designs, plans and working drawings.
 - Draw up tender documentation and contracts.
 - Call for tenders, evaluate submissions and make appointments of experienced contractors.
 - Alternatively execute the project with labour-based construction methods with emphasis on training of local emerging contractors.
 - Coordinate and manage the project in cooperation with stakeholders.
 - Monitor and supervise conventional construction and EPWP Labour-Intensive Projects.
 - Construction management and monitoring for emerging contractors who have not yet completed the NQF Level 2 and 4.
 - Issue payment certificates and monitor the total budget.
 - Post project reviews.
 - Project management.

EXPERTISE AND EXPERIENCE

SCIP has extensive knowledge, expertise and experience in the following fields:

6.1 Housing and Human Settlement

- Project Identification
- Subsidy administration
- Community participation
- Feasibility studies
- Detailed investigations
- Beneficiary & Occupancy Audits

6.2 Labour-Intensive Construction

- Training of local emerging contractors to comply with EPWP
- Skills development and empowerment for labour-Intensive
- Construction techniques
- Construction management
- Materials management
- Brick paving and manufacturing
- Macadam, Waterbound and Slurrybound, road construction

6.3 Project Management

- Preparation of funding applications
- Township establishment
- Construction management
- Management of capital
- Expenditure programmes
- Geotechnical surveys
- Environmental impact assessments
- Construction management

6.4 Water

- Water reticulation
- Reservoirs and water towers
- Main pipelines and pump stations
- Modelling and design
- Corrosion control
- Infrastructure rehabilitation and assessment
- Regulatory compliance/permitting
- Safe yield analysis for dams
- Water resources modelling and planning
- Master planning

6.5 Stormwater and Flood Analysis

- Stormwater management systems
- Flood line determination
- Stormwater reticulation
- Hydraulic / Hydrologic modelling and design
- Retention ponds and attenuation
- Flood studies and risk assessment
- Flood modelling for dams

6.6 Sewer

- Sewerage reticulation
- Main outfall sewer
- Pump stations and pumping mains
- Water purification works
- Infrastructure rehabilitation and assessment
- Modelling and design
- Master planning

6.7 Roads

- Township roads and bridges
- Provincial roads and bridges
- National roads
- Rehabilitation / Upgrading of roads
- Parking areas

6.8 Structures

- Factories and warehouses
- Buildings
- Water retaining structures
- Bridges

6.9 Sports and Recreation Facilities

- Sports grounds and stadiums
- Recreation resorts, including all amenities
- Landscaping and irrigation systems
- Labour based paving projects.
- Olympic size pools

6.10 Abattoir and Meat Processing

- Abattoir layouts
- Livestock holding and handling
- Dressing procedures on both mechanical and static lines
- Offal handling and processing
- Cold room and freezer facilities
- De-boning plants
- By product plants
- Meat processing and small goods manufacturing plants
- Wholesale facilities
- Tanneries

INFRASTRUCTURE FOR THE MEAT INDUSTRY

7.1

ABATTOIR & MEAT PROCESSING OVERVIEW

SCIP Engineering Group in association with van Vliet de Wet and Partners, offer mechanical, structural and civil consulting engineering services specializing in abattoirs, meat processing facilities and allied projects. The partners of the firm have for the last 35 years been intimately involved in the design and supervision during construction of plants and equipment for the meat industry. Their experience covers all aspects of abattoir and meat processing facilities, both locally and internationally.

The partners were responsible for the planning and supervision work during construction of many new abattoirs. These abattoirs range in size from the small rural facilities to some of the largest abattoirs in the country. A number of these abattoirs have been designed to comply with the stringent European Union export standards. They also include the design of slaughter facilities complying with Halaal and Kosher ritual requirements. The firm also has extensive experience in up-grading existing plants to improve throughput and to optimise the use of existing facilities.

The partners have been involved in more than 90 abattoirs and meat processing facilities.

7.2 INTEGRATED CONSULTING SERVICES

The services offered vary from a full engineering consultancy including preliminary design, obtaining approvals, detailed design, calling for and placing tenders, supervising construction and project management, to a partial service of only preparing designs for statutory approvals.

Other services which can be provided include assistance in site selection, economic viability studies, including determining the capacity of plants, estimates of building costs, labour requirements, running costs, long term expansion planning, advice on standard equipment and building finishes, the procurement and design of special items of equipment etc.

The firm is therefore able to offer the most experienced team and experts available to concentrate on the requirements of abattoir & meat processing project.

COMPANY RESOURCES

In order to provide world-class engineering design service, SCIP uses only the most advanced engineering software available.

We employ Engineering Enterprise Modelling to ensure that engineering design, drawing, quantities, administration and documentation are linked to a single database for each project.

Bentley Microstation	Two and three dimensional design and drafting
Bentley OpenRoads Designer	Design capabilities for surveying, drainage, subsurface utilities, and roadway design
Prostructures	Create 3D models for structural steel, metal work, and reinforced concrete structures
STAAD Pro	Structural analysis and design software
SITEOPS	Conceptual site design software
OpenFlows FlowMaster	Hydraulic Calculator Software
ContextCapture	Reality Modelling Software
ContextCapture Editor	Fast and easy manipulation of 3D meshes
Autodesk AutoCAD	Computer-aided design and drafting software application
Autodesk Revit	Building information modelling software
Robot Structural Analysis	Structural load analysis software
Autodesk ReCap Pro	Reality capture software
Autodesk Civil 3D	Civil engineering design software
BIM 360 Design	Real-time design collaboration and data management in Revit
Autodesk 3ds Max	3D animations, models and images
AutoCAD Map 3D	Creating and managing spatial data
Prokon	Structural analysis and design software
Bill Project	Project Cost Management
Trafsoft Road Signs	Road sign design and database
Civil Designer	Integrated civil infrastructure design suite
ESRI ArcGIS	GIS and mapping
Smartsheet	Project management
Microsoft Office	Suite of programs for common productivity tasks
